

The Clipper system was first released some 15 years ago and has established itself as a cost effective, reliable and simple to install Nursecall System. The Clipper display unit has bright easy to read LED's which informs the viewer of the zone/area, type of room (bedroom, dayroom, bathroom, WC) and of the number of the calling room.

On installation the Clipper is manually set and needs no intervention from computers or specialist programming equipment. The Clipper Call Unit has three levels of call: resident, staff assist and emergency and also has an integral call/cancel button. For WC's and En-suites the Clipper has an input for the associated pull cord.

The Clipper display unit has volume control settings and also notifies when there is a visitor at the front door or if the resident opens the monitored external doors.

## Clipper Call Unit

Facia - Single Gang

B/box - Single Gang 35mm deep

Cable - 8 or 12 core Alarm

## Clipper Display Unit

Facia - Double Gang

B/box - Double Gang 35mm deep
