

Nursecall Dashboard

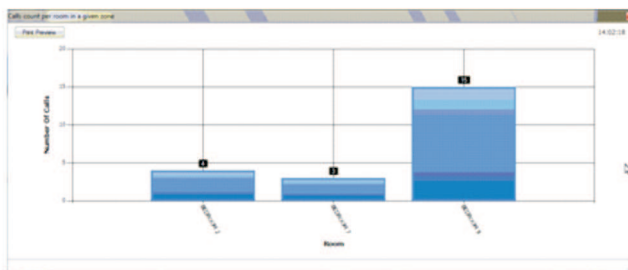

The ENS Call Manager Dashboard is a best in class graphical user interface designed to give Care Managers the critical data they need on a live screen 24hrs a day. Busy Managers do not have the time to sift through data looking for the facts and that is why the ENS Dashboard has been produced to give a continuous visual overview of the Nursecall activity, including the following information:

- ✓ All Nursecall Activity Recorded
- ✓ Graphical representation of data
- ✓ Real time call identification
- ✓ Longest call response time
- ✓ Average call response time
- ✓ Busiest zone indication
- ✓ Call time and date stamp
- ✓ Data export to Excel
- ✓ Compatible with Microsoft Windows 7 64 and 32 bit
- ✓ Integrates with ENS messaging platform
- ✓ Utilizes SQL 2008 engine as a database platform
- ✓ Small database footprint

System Requirements

- Windows 7 (32 bit) Operating System*
- 2Ghz Processor
- 4GB of RAM
- 100GB Hard Drive**
- Serial Communication Port***
- Network Card (Ethernet)

- * Product should be compatible with Windows XP, however this is not recommended
- ** Depending on how busy the nursecall system is a bigger drive may be required
- *** More ports may be required, depending on the installation type
