

## Door entry & access control

ENS NurseCom® integrates telephony based door entry allowing visitors calls to be received on fixed position and mobile staff handsets. Staff can communicate with the visitor and release the door lock remotely from their handset. The front door panels are scalable from a one button call to multi dwelling communications.

Residents and staff carry small proximity key fobs which will allow automatic entrance through doors when presented at the door entry reader. Key fobs can be easily programmed 'in or out' of the network at any time.

NOTE: Whilst these panels are weatherproof they will not survive assault by Jet wash or pressure cleaners or chemical attacks involving brick cleaning agents.

### Recessed Access Panel

Facia - Bespoke

B/box - Bespoke to suit client requirement

Cable - 12v DC Power Required  
- Single analogue phone line

Installation Requirements:

- Chasing for back box
- Fixing nogging

### Surface Mount Access Panel

Facia - Bespoke

B/box - Bespoke to suit client requirement

Cable - 12v DC Power Required  
- Single analogue phone line

Installation Requirements:

- Suitable Sturdy Pillar or Wall with Fixing nogging or appropriate substrate.
